## Industry Certifications

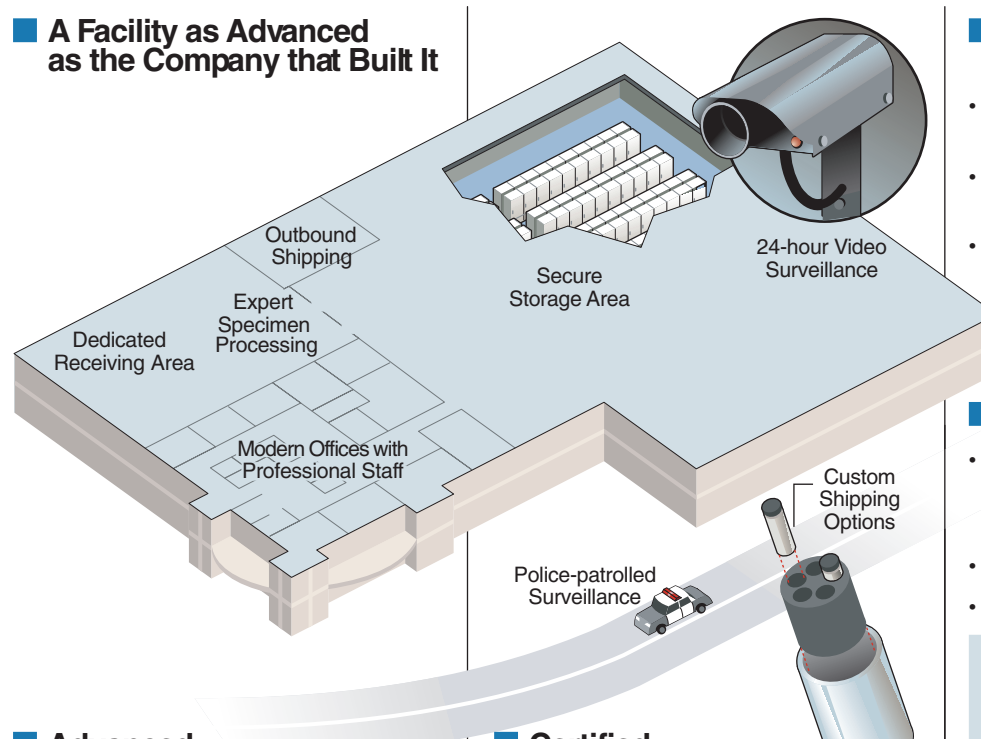

- FDA registered for the storage of human cells, tissues and cellular and tissue based products (HCT/Ps)
- Title 21 CFR Part 11 compliant facility and inventory management software
- Indiana Board of Pharmacy Wholesale Drug Distributor License for the storage and distribution of pharmaceutical products and active pharmaceutical ingredients (API).

# A Custom-Built, World-Class Biorepository

Our 22,500 square-foot facility was custom-designed to provide world-class biorepository and sample logistics services. We specialize in long-term specimen integrity, pinpoint tracking of biomaterials and safe, efficient global shipping.

## A Facility as Advanced as the Company that Built It

## Advanced Security Features

- Police-patrolled surveillance
- All-concrete, reinforced structure
- 24-hour video surveillance
- Motion, burglar and fire detection
- Fire and smoke suppression
- Card-controlled, locked entry

## Certified Worldwide Logistics

- End-to-end logistics management and tracking
- Temperature-controlled shipping containers
- U.S. Customs, U.N., DOT and I.A.T.A. compliant
- Partnerships with FedEx, UPS and DHL

## Guaranteed Power and Cooling Sources

- Onsite generator can support 120% of total facility power needs
- Back-up freezers and cooling systems
- Guaranteed contracts for diesel, nitrogen and dry ice delivery

## Convenient Location

- Federal Express hub, DHL & UPS, allowing earlier drop offs and later pick ups.
- Indianapolis International Airport
- Five major interstates within 15 miles

## ELPRO DATALOGGER

[www.elpro.com](http://www.elpro.com)

- Network compatible (LAN or WAN) 4-channel datalogger
- Capacity for recording 64,000 measured values
- Built-in battery to ensure data continues to be logged in the event of a power failure
- Operating parameters of sensors, -200°C to 600°C
- Designed for logging temperatures & relative humidity
- FDA-Title 21 CFR Part 11 compliant

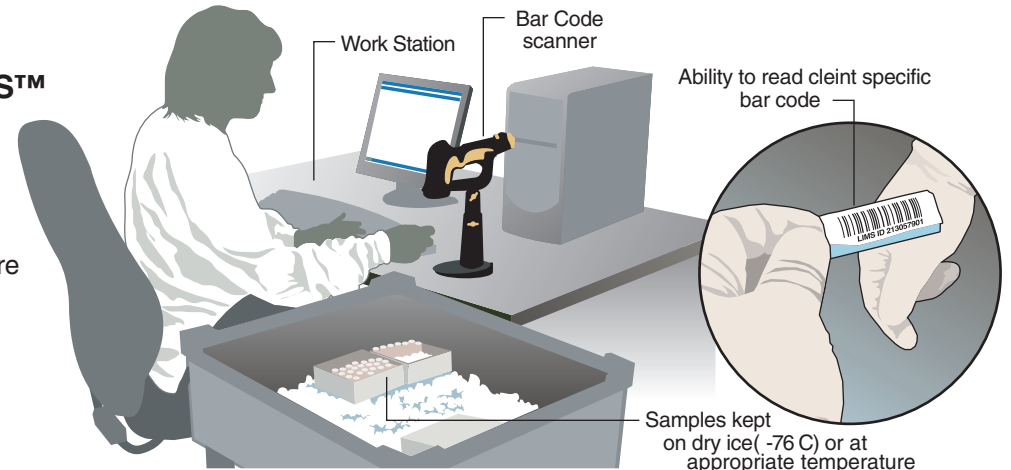

## Sophisticated Storage Features

- Individually-locked Sanyo VIP-Series freezers and refrigerators
- Dial-out alarms alert staff to temperature deviation
- Storage options to meet individual client specifications
- Storage temperatures from 20°C to -190°C
- Networked ELPRO temperature monitoring system provides proactive, state-of-the-art, continuous electronic sample and freezer monitoring

## Proprietary Inventory Management System, ISS™

- FDA-Title 21 CFR Part 11 compliant inventory management system tracks all biomaterials handling and information
- Captures logistics and temperature data into permanent audit trails
- Retains original bar codes for each sample
- Maintains full audit trails and documentation
- Provides secure web-based access to real-time data

## Unprecedented Quality Assurance

- Over 80 stringent SOPs
- Dedicated logistics and quality assurance personnel
- 24-hour, on-call expert staff
- Antimicrobial floor and universal precautions area
- Comprehensive business continuity and disaster recovery plans

## Card-controlled, Locked Entry

- Access to biomaterials is limited by employee role and fully documented
