**IMPORTANT INFORMATION OR WARNING** 

Reference to resuming chapter or document

In the interest of our customers we reserve the right to make any changes resulting from technical advances. Therefore, schemes, descriptions and extent of delivery are subject to change without notice! This manual is valid as from software release elpro-LOG MONITOR-WebUpload 1.0x

# 1. Introduction

#### Version

The software is delivered on a CD-ROM with the following designation: 1.0xx The ReadMe file shows the current version number of the software The elproLOG MONITOR-WebUpload software will be used to transfer periodical elproLOG MONITOR log files to a Web-Server. It is used to specify the folders where the protocols are stored and for the configuration of the used Webservers.

elproLOG MONITOR-WebUpload is not required in cases where the Web-Server and the monitoring PC are running within the same network.

#### **1.1 Software Requirements**

- PC with Internet access and browser
- elproLOG MONITOR Version 3.50 or higher.

"Administrator" rights are required to make a successful installation.

# **€IPRC**

# 2. Installation

- 1. Insert the CD into the CD-ROM drive.
  - The CD uses an auto run function so the installation routine should start automatically.
  - If this is not the case, open the Windows Explorer and switch to the CD-ROM drive. To install the software, double-click with the left mouse button on the elproLOG - symbol.

Information about the software version, history and features see the "ReadMe File"
